- The initial payment only relates to the application, and initial assessment, for certification/registration. Other fees will apply for other activities (for example experienced worker route assessment, reassessment, renewal, work notification, cancelled assessments).
- If the operative information provided indicates the need for an Experienced Worker Route (EWR) assessment, NAPIT will contact you to discuss the process and fees involved. This is available for heating, ventilation/air conditioning and plumbing operatives.
- MCS applicants should note that they must join a CTSI Approved Consumer Code Scheme which is not done via NAPIT and incurs additional charges from the Approved Consumer Code Scheme.

## Microgeneration Work

Microgeneration work can be assessed and certificated to meet the requirements of the following Government\* schemes.

Please indicate below which schemes you wish to join then complete the scope of assessment table to give more detail about the nature of your work.

<b>Company Name:</b>	
----------------------	--

Available Schemes		Tick
<b>MCS</b>	<b>Microgeneration Certification Scheme (MCS)</b> giving customers access to incentives such as feed-in-tariffs and renewable heat incentive payments.	
<b>CPS</b>	<b>Competent Person Schemes (CPS)</b> allowing self-certification against the Building Regulations in England and Wales.	
<b>EEM</b>	<b>Energy Efficiency Measures (EEM)</b> via MCS certification to demonstrate PAS 2030 equivalence and operate under the Energy Company Obligation (ECO). This is done by verifying compliance against MCS 023. To carry out work under ECO, you will also need to be TrustMark registered.	
<b>GDI</b>	<b>Green Deal Installer (GDI)</b> , in addition to EEM certification an assessment against the Green Deal Code of Practice allows listing as a green deal participant for carrying out installation work funded with Green Deal finance.	
<b>TM</b>	<b>TrustMark</b> is a scheme to help consumers identify a reputable tradesperson. NAPIT Scheme Members doing domestic work are eligible to be listed where relevant as "Solar Panel Installers (PV)" on the TrustMark site. NAPIT understands that the other technologies will be listed in future.	

### CONSUMER CODE SCHEME

MCS001 requires installers to be a member of a TSI Approved Consumer Code Scheme (even where not carrying out work for consumers). This will be required before certification is issued. Please indicate your status below:

Status	Not yet applied	Application in progress	Member of a Code
If a member, please tell us which scheme (e.g. RECC/HIES)			Scheme Member Number

### ASSESSMENT

For microgeneration work assessments will be arranged based on the technologies applied for below. Assessment includes office/systems assessment against MCS001 (plus MCS023 for EEM and/or GDI) and installation work against the installation standards MIS3001-MIS3007 as applicable. Work only applicable to CPS will be assessed against the Minimum Technical Competence document.

Column A is used to identify how many site assessments are needed and column B to determine the detailed scope of certification. It is assumed that all the items in column B will be available to assess competence on the visit (generally the most complex system will be seen). If the visit requires more than one site only those within a 30 minute journey will be valid without further charges.
